Accounting Officer's Responsibilities and Approval

Certification by the Municipal Manager

I, am responsible for the preparation of these annual financial statements, which are set out on pages 1 to 119, in terms of Section 126(1) of the Municipal Finance Management Act (56 of 2003) and which I have signed on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors as disclose in Note 36 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearer Act and the Minister of Provincial and Local Governments determination in accordance with this Act

M A Nkosi
Municipal Manager

Statement of Comparison of Budget and Actual Amounts

Budget on Cash Basis

	Approved budget	Adjustments	Final Budget	Actual amounts on comparable basis	Difference between final budget and actual	Reference
Figures in Rand						
Depreciation and amortisation	(302,848,333)	-	(302,848,333)	(464,535,534)	(161,687,201)	The increase is due to the conditional assessment which was undertaken by SMEC South Africa. This culminated in a material decrease in the remaining useful lives of assets, which led to accelerated depreciation. The depreciation is almost doubled.
Impairment of assets	-	-	-	(16,571,487)	(16,571,487)	
Finance costs	(60,738,111)	(197,971)	(60,936,082)	(71,169,271)	(10,233,189)	
Debt impairment	(144,577,000)	-	(144,577,000)	(222,109,923)	(77,532,923)	Vulindela customers whose historical payment rate is 0.04% when they were consumers of Umgeni was not considered at budget preparation.
Collection costs	(3,563,440)	(3,870,330)	(7,433,770)	(5,972,677)	1,461,093

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1. Presentation of annual financial statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003). The reporting framework is as prescribed by the Accounting Standards Board in Directive 5.

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

The accounting policies applied are consistent with those used to present the previous years financial statements, unless explicitly stated.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Fair value estimation of useful lives of property, plant and equipment, investment property and intangible assets

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the statement of financial position date. The quoted market price used for financial assets held by the municipality is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at each statement of financial position date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using quoted forward exchange rates at the statement of financial position date.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

Impairment testing

The recoverable amounts of cash-generating units and non cash generating assets have been determined based on the higher of fair value less cost to sell and value in use. These calculations require the use of estimates and assumptions.

The reporting date reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. In addition, goodwill is tested on an annual basis for impairment. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors together with economic factors.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty (continued)

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 20 - Provisions.

Useful lives of property plant and equipment

The municipality's management determines the estimated useful lives and related depreciation charges for the waste water and water networks. This estimate is based on industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 21.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Allowance for doubtful debts

On trade and other receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the trade and other receivables carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Budget information

Deviation between budget and actual amounts exceeding 10 percent are obtained monthly for the preparation of the section 71 reporting and used during the audit process.

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, to meet service delivery objectives, for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.4 Property, plant and equipment (continued)

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and standby equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and standby equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at depreciated replacement cost, being the cost at the date of assessment less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Assessments are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using cost at the reporting period.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Useful life
Land	Infinite
Infrastructure	
• Roads and motorways	5 - 100 years
• System security	5 - 10 years
• Storm water drainage	25 - 120 years
• Airport infrastructure	20 years
• Solid waste	5 - 50 years
• Water and sanitation	10 - 100 years
• Major substations : buildings	5 - 50 years
• Transformers and related equipment	50 years
• Mains	45 years
• Street lighting	50 years
Community	
• Buildings	5 - 50 years
• Recreational facilities	5 - 50 years
Other property, plant and equipment	
• Buildings	5 - 50 years
• Fresh produce and other markets	5 - 50 years
• Fire engines	20 years
• Landfill site	5 - 50 years
• Transport facilities	5 - 50 years
• Fencing	10 years
• Heavy and mobile plant	10 - 15 years
• Furniture and fittings	7 - 10 years
• Vehicles	5 - 7 years
• Bins and containers	5 - 10 years
• Plant and equipment	5 - 15 years
• Office equipment	3 - 5 years

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.4 Property, plant and equipment (continued)

The useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

1.5 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A intangible asset is an identifiable non-monetary asset without physical substance.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Intangible assets are initially recognised at cost and comprises of software and servitudes.

An intangible asset acquired through a non-exchange transaction, the cost shall be its fair value as at the date of acquisition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.5 Intangible assets (continued)

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software, internally generated	3 - 5 years
Servitudes	indefinite

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

1.6 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the entity determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the entity becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on property, plant and equipment.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.6 Investment property (continued)

Item	Average useful life
Property - land	Infinite
Property - buildings	5 - 50 years

1.7 Heritage assets

Assets are resources controlled by an municipality as a result of past events and from which future economic benefits or service potential are expected to flow to the municipality.

Carrying amount is the amount at which an asset is recognised after deducting accumulated impairment losses.

Class of heritage assets means a grouping of heritage assets of a similar nature or function in an municipality's operations that is shown as a single item for the purpose of disclosure in the annual financial statements.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Depreciation is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

An impairment loss of a cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable amount.

An impairment loss of a non-cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable service amount.

An inalienable item is an asset that a municipality is required by law or otherwise to retain indefinitely and cannot be disposed of without consent.

Recoverable amount is the higher of a cash-generating asset's net selling price and its value in use.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Value in use of a cash-generating asset is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

Value in use of a non-cash-generating asset is the present value of the asset's remaining service potential.

A heritage asset qualifies for recognition as an asset as it is measured at its cost and any cost directly attributable to bringing the heritage asset to the location and condition necessary for it to be capable of operating in this manner intended by the Municipality.

Where a heritage asset is acquired through a non exchange transaction, its deemed cost is to measured at its fair values as at the date of acquisition. If at initial recognition the municipality cannot reliably measure its cost, the relevant and useful information about the heritage asset is disclosed in the notes to the annual financial statements.

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.7 Heritage assets (continued)

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

After recognition as an asset, a class of heritage assets, whose fair value can be measured reliably, is carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent impairment losses.

If a heritage asset's carrying amount is increased as a result of a revaluation, the increase is credited directly to a revaluation surplus. However, the increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same heritage asset previously recognised in surplus or deficit.

If a heritage asset's carrying amount is decreased as a result of a revaluation, the decrease is recognised in surplus or deficit. However, the decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that heritage asset.

Impairment

The municipality assess at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

1.8 Agricultural assets

The entity recognises a agricultural assets or agricultural produce when, and only when:

- the entity controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

Biological assets are assets that undergo a biological transformation through an agriculture activity.

Agricultural assets that form part of an agricultural activity are measured at their fair value less costs to sell.

The fair value of the tree plantations is based on the combined fair value of the land and the vines / pine trees. The fair value of the raw land and land improvements is then deducted from the combined fair value to determine the fair value of the vines / pine trees.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.8 Agricultural assets (continued)

A gain or loss arising on initial recognition of agricultural produce at fair value less costs to sell and from a change in fair value less costs to sell of agriculture produce is included in surplus or deficit for the period in which it arises.

Where market determined prices or values are not available, the present value of the expected net cash inflows from the asset, discounted at a current market-determined pre-tax rate where applicable is used to determine fair value.

1.9 Capital under construction

Incomplete construction work is recognised as capital under construction and measured at cost. Depreciation only commences when the asset is commissioned into use.

1.10 Capital commitments

A capital commitment is a binding agreement to undertake capital expenditure at some set time in the future which has not yet become an actual liability.

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

1.11 Inventories

Inventories are initially measured at cost except where the inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Water is valued at purified cost in so far as it stored and controlled in the reservoirs at year end.

1.12 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

1.13 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Finance leases

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.13 Leases (continued)

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as asset / liability.

This liability is not discounted.

Any contingent rents are expensed in the period they are incurred.

The Msunduzi Municipality is the lessee of all operating lease agreements.

1.14 Investments

Where the carrying amount of an investment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the Statement of Financial Performance.

1.15 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

Financial instruments are initially recognised at fair value. In the case of a financial instrument not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial instrument are added to the fair value .

Financial Instruments are categorised according to their nature as either financial instruments at fair value, held at amortised cost, or held at cost. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and re-evaluates this designation at every reporting date.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.15 Financial instruments (continued)

Trade and other receivables

Trade and other receivables are initially recognised at fair value plus any transaction costs and subsequently measured at amortized cost using the effective interest method, less provision for impairment.

A provision for impairment of trade and other receivables is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of the trade and other receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. Impairment losses are recognised in the Statement of Financial Performance.

An estimate is made for doubtful debts based on the categorisation of debts and a review of past trends in collection rates applied to all outstanding amounts at year-end.

Creditors

Trade payables are initially measured at fair value plus any transaction costs, and are subsequently measured at amortised cost, using the effective interest rate method.

Cash and cash equivalents

These are initially and subsequently recorded at fair value. For cash flow purposes cash and cash equivalents includes cash on hand, deposits held at call with banks, other short-term highly liquid investments, and bank overdrafts. Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred.

Loans and receivables

Loans and receivables are measured initially and subsequently at fair value, gains and losses arising from changes in fair value are included in the Statement of Financial Performance for the period.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and with no intention of trading. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets. Loans and receivables are included in trade and other receivables in the Statement of Financial Position.

Fixed and Negotiable Deposits

Fixed and negotiable deposits are non-derivative financial assets with fixed or determinable payments and fixed maturities that the municipality will hold to maturity.

Fixed and negotiable deposits are initially and subsequently measured at fair value which in the case of investments that have an original maturity date of less than 12 months equates the cost. Fixed and negotiable deposits held for greater than 12 months are fair valued annually and the difference recognised in the statement of financial performance.

On disposal of fixed and negotiable deposits, the difference between the net disposal proceeds and the carrying amount is charged or credited to the Statement of Financial Performance.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.15 Financial instruments (continued)

Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Type of financial asset

Receivables from exchange transactions
Receivables from non-exchange transactions
Bank, cash and cash equivalents – notice deposits
Bank, cash and cash equivalents – call deposits
Bank, cash and cash equivalents – bank
Bank, cash and cash equivalents – cash

Category

Financial asset measured at amortised cost
Financial asset measured at amortised cost
Financial asset measured at fair value
Financial asset measured at fair value
Financial asset measured at fair value
Financial asset measured at fair value

Type of Financial Liability

Long-term liabilities
Payables from exchange transactions
Payables from non-exchange transactions
Current portion of long-term liabilities

Category

Financial liability measured at amortised cost
Financial liability measured at amortised cost
Financial liability measured at amortised cost
Financial liability measured at amortised cost

1.16 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

Provisions are reviewed at reporting date and adjusted to reflect the current best estimate.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Contingent assets and contingent liabilities are recognised note 60.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.17 Employee benefits

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measures the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognises the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Post-employment benefits: defined contribution plans

The municipality provides retirement benefits for its employees and councillors. Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the municipality's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

The Natal Joint Provident, Dynamique Ambrella (Pietermaritzburg Provident Fund) and Umgeni Provident Fund are defined contribution plans. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable.

The Municipality pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Municipality has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

Post-employment benefits: Defined benefit plans

A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation

The Natal Joint Pension Fund, Government Employees Pension Fund, Association Institution Pension Fund, South African Local Authorities Pension Fund and the Councillors Pension Fund are defined benefit. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.17 Employee benefits (continued)

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Pension obligations

The municipality employees contribute to 7 different Pension Funds, of which the Natal Joint Provident and Retirement Pension Fund cater for the majority of the staff.

The following are defined benefit funds:

- *The Natal Joint Provident,
- * Dynamique Ambrella (Pietermaritzburg Provident Fund) and
- *Umgeni Provident Fund .

The following are defined contribution funds:

The Msunduzi Municipality

- *Association Institution Pension Fund,
- *South African Local Authorities Pension Fund and
- * Councillors Pension Fund

Actuarial valuations are conducted on an interim basis each year with a statutory valuation undertaken every three years. Consideration is given to any extent that could impact the Funds up to the end of the reporting period where the interim valuation is performed at an earlier date.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The Municipality has both defined benefit and defined contribution plans.

The liability / asset recognized in the statement of financial position in respect of defined benefit pension plans is equal to the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognized actuarial gains or losses and past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.

Past-service costs are recognised immediately against revenue.

Any asset is limited to unrecognized actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

Natal Joint Retirement Funds, Government Employee Pension Fund and Associated Institution Pension Fund are defined benefit funds

The Natal Joint Provident Fund, Pietermaritzburg and South African Local Authority are defined contribution funds.

Other post retirement obligations

The municipality provides post-retirement healthcare benefits to their retirees. The entitlement to these benefits is usually conditional on the employee remaining in service up to retirement age and the completion of a minimum service period. Actuarial gains and losses arising from experience adjustments, and changes in actuarial assumptions, are charged or credited to income in the year that they arise.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.18 Impairment of non-cash-generating assets

Non-cash generating assets are those assets held by the municipality without an intention of generating a commercial return and held primarily for service delivery purposes. The Municipality classifies all assets held with the primary objective of generating a commercial return as cash generating assets.

The municipality will apply its judgment and disclose the criteria used in making such judgment in cases where it's not clear whether the primary objective is to generate a commercial return. The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality determines the recoverable service amount of the asset. The recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

If the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired and is recognised immediately in the Statement of Financial Performance.

An impairment loss is when the asset's carrying amount exceeds its recoverable service amount and is recognised in the Statement of Financial Performance.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in the Statement of Financial Performance. The increase in the carrying amount of an asset due to the reversal of an impairment loss should not exceed what the carrying amount would have been if no impairment loss had been recognised.

Intangible assets with indefinite useful lives and not yet available for use, are tested for impairment annually, irrespective of whether any indication of impairment exists.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired. The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.18 Impairment of non-cash-generating assets (continued)

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.18 Impairment of non-cash-generating assets (continued)

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.19 Change in accounting policy, estimates and errors

When accounting errors have been identified in the current year, the correction is applied retrospectively as far as it is practicable and the prior year comparatives are restated accordingly. When there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as it is practicable and the prior year comparative is restated accordingly.

Where there has been a change in accounting policy in the current year, the adjustments is made retrospectively as far as is practicable and the prior year comparative are restated accordingly.

1.20 Housing development fund

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

1.21 Use of Estimates

The preparation of annual financial statements in conformity with Generally Recognised Accounting Practice requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the municipality's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the annual financial statements are disclosed in the relevant sections of the annual financial statements. Although these estimates are based on management's best knowledge of current events and actions they may undertake in the future, actual results ultimately may differ from those estimates.

1.22 Budget information

Municipalities are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2014-07-01 to 2015-06-30.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

The Statement of comparative and actual information has been included in the annual financial statements as the recommended disclosure when the annual financial statements and the budget are on the same basis of accounting as determined by National Treasury.

Comparative information is not required.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.23 Comparative figures

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.24 Revenue from exchange transactions

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Revenue from the sale of electricity prepaid meter cards are recognised at the point of sale.

Service charges relating to refuse removal are recognised on a monthly basis by applying the approved tariff to each property based on category of property and the property value.

Service charges from sewerage and sanitation are based on water consumption and are levied monthly.

Interest and rentals are recognised on a time proportion basis.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariff. This includes the issuing of licences and permits.

Income for agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

Revenue from the sale of goods is recognised when the risk is passed to the consumer.

Revenue arising out of situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services.

All other revenue is recognised as it accrues.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by services performed to date as a percentage of total services to be performed.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- The municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.24 Revenue from exchange transactions (continued)

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- The stage of completion of the transaction at the reporting date can be measured reliably; and
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

1.25 Conditional Grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with all of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder, it is recorded as part of the creditor. If it is the Municipality's interest, it is recognised as interest earned in the Statement of Financial Performance.

Grants and receipts of a revenue nature: income is transferred as revenue to the Statement of Financial Performance to the extent that the criteria, conditions or obligations have been met.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.26 Revenue from non-exchange transactions

Refers to transactions where the municipality received revenue from another entity without giving approximately equal value in exchange. Revenue from non exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis with reference to the principal amount and the effective interest rate applicable.

Fines constitute both spot fines and summons. Fines are recognised when the fines are issued.

Donations are recognised on a cash receipt basis or where the donation is in the form of property, plant and equipment, at the fair value of the consideration received or receivable.

Contributed property, plant and equipment is recognised when ownership of the items of property, plant and equipment is transferred to the municipality.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

Income received from conditional grants, donations and subsidies is recognised to the extent that the Municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met, a liability is recognised and funds are invested until utilised.

Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder, it is recorded as part of the creditor. If it is the Municipality's interest, it is recognised as interest earned in the Statement of Financial Performance.

Grants and receipts of a revenue nature: income is transferred as revenue to the Statement of Financial Performance to the extent that the criteria, conditions or obligations have been met.

The municipality recognises the full amount of revenue of the fine issued at the transaction date when there is uncertainty about the municipality's ability to collect such revenue from the fine, based on past history, the municipality has an obligation to collect all revenue due to it.

Subsequent to initial recognition and measurement, the municipality assess the collectability of the revenue and recognises an impairment loss where appropriate for example there the municipality may offer early settlement discounts or amnesty periods.

Where these reductions exist, the municipality considers past history in assessing the likelihood of these discounts or reductions being taken up the debtors.

1.27 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.28 Unauthorised expenditure

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003).

Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance.

Where unauthorised expenditure is not approved, upon the finalisation of an investigation, it is recovered from the responsible person and the amount received is accounted for as revenue in the Statement of Financial Performance.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.29 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the Statement of Financial Performance in the year that the expenditure was incurred.

The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.30 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.31 Grant in aid

The Msunduzi Municipality awards grants to individuals, institutions and organisations based on merit. When making these transfers the Municipality does not:

- * Receive any goods or services directly in return, as would be expected in a purchase or sale transaction
- * Expect to be repaid in future; or
- * Expect a financial return, as would be expected from an investment

These transfers are recognised in the financial statements as expenses in the period that the events giving rise to the transfer occurred.

1.32 Related parties

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Parties are considered to be related if one party directly or indirectly has the ability to control the other party or exercise significant influence over the party in making financial and operating decisions or is a member of the key management of the municipality or entity .

1.33 Internal Reserves

Capital replacement reserve (CRR)

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.33 Internal Reserves (continued)

The CRR is an asset financing source that represents an alternative to the other funding sources available to the municipality namely external loans (interest bearing borrowings) and government grants & subsidies. It is a GRAP requirement that the balance on the CRR must always be represented by cash, which must be held in a separate identifiable investment account.

Subsequent to the implementation of GRAP in 2008, Reserves and Funds had to be discontinued as they are not permissible in terms of GRAP. However the National Treasury determined that the CRR is one of the few funds and reserves that are allowed. Therefore it is a requirement that since fund accounting is not allowed in terms of GRAP, for disclosure in the Annual Financial Statements, CRR forms part of Accumulated Surplus and should not be disclosed on the face of the Statement of Financial Position.

As a matter of principle, the focus is the manner in which these reserves are created and accounted for, which in this instance the capital replacement of major components of Infrastructure Assets in the event of technical failure. For accounting purposes, the CRR will be created by transferring amounts out of Accumulated surpluses/deficits to the respective reserve account, or vice versa, in the Statement of Changes in Net Assets. The net effect of these transfers will be nil in the Statement of Changes in Net Assets, and will not affect the value of reserves in totality. It is the requirement of GRAP that no transactions should be accounted for, directly to the Statement of Changes in Net Assets other than those specifically allowed in terms of GRAP, i.e. Revaluation Surplus Reserve. Therefore situations should be avoided where reserves are created and accounted for, by taking amounts directly to the Statement of Changes in Net Assets thereby circumventing the Statement of Financial Performance.

The municipality has determined a policy on the revenue sources that will be used to maintain or increase the balance of the CRR. These revenue sources include, but not limited to, the following:

- Interest earned by the municipality on the CRR investment account;
- Cash proceeds from the sale of any item of PPE or Investment Property;
- Percentage of amount that was utilised in the previous financial year for the purchase of items of PPE;
- VAT input recovered from SARS.

The CRR will only be utilised for the purpose of purchasing items of property, plant and equipment for the municipality and will not be used for the maintenance of such items.

Self insurance reserve

A self-insurance reserve was established and, subject to external insurance where deemed necessary, covers claims that might occur. Premiums are charged to the respective services taking into account claims history and the replacement value of the insured assets.

Revaluation reserve

The surplus arising from the revaluation of heritage assets is credited to a non-distributable reserve. The revaluation surplus is realised as revalued artworks are depreciated, through a transfer from the revaluation reserve to the accumulated surplus/deficit. On disposal, the net revaluation surplus is transferred to the accumulated surplus/deficit while gains or losses on disposal, based on revalued amounts, are credited or charged to the Statement of Financial Performance.

1.34 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- Those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- Those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

2. New standards and interpretations

2.1 Standards and interpretations issued and adopted

Entities are required to apply the standards of GRAP where the Minister has determined the effective date. The Minister has determined the effective date for the following standards of GRAP:

Reference	Topic
GRAP 1	Presentation of financial statements (as revised in 2010)
GRAP 2	Cash flow statements (as revised in 2010)
GRAP 3	Accounting policies, changes in accounting estimates and errors (as revised in 2010)
GRAP 4	The effects of changes in foreign exchange rates (as revised in 2010)
GRAP 5	Borrowing costs (as revised in 2013)
GRAP 6	Consolidated and separate financial statements
GRAP 7	Investments in associates
GRAP 8	Interests in joint ventures
GRAP 9	Revenue from exchange transactions (as revised in 2010)
GRAP 10	Financial reporting in hyperinflationary economies (as revised in 2010)
GRAP 11	Construction contracts (as revised in 2010)
GRAP 12	Inventories (as revised in 2010)
GRAP 13	Leases (as revised in 2010)
GRAP 14	Events after the reporting date (as revised in 2010)
GRAP 16	Investment property (as revised in 2010)
GRAP 17	Property, plant and equipment (as revised in 2010)
GRAP 19	Provisions, contingent liabilities and contingent assets (as revised in 2010)
GRAP 20	Related party disclosures
GRAP 21	Impairment of non- cash-generated assets
GRAP 23	Revenue from non-exchange transactions (taxes and transfers)
GRAP 24	Presentation of budget information in financial statements
GRAP 25	Employee benefits
GRAP 26	Impairment of cash-generated assets
GRAP 27	Agriculture
GRAP 31	Intangible assets (replace grap 102)
GRAP 100	Discontinued operations (as revised in 2013)
GRAP 103	Heritage assets
GRAP 104	Financial instruments

3. Inventories

Land held for distribution and sale	-	693,428,000
Forestry	702,788	577,831
Consumable stores	43,764,387	46,198,192
Fuel - diesel and petrol	1,277,581	1,443,434
Unused water stock	6,482,345	5,988,575
	52,227,101	747,636,032
Impairment of inventories	(5,489,800)	(5,071,297)
	46,737,301	742,564,735

Carrying value of inventories carried at fair value less costs to sell	46,737,301	742,564,735
--	------------	-------------

Cost of inventories recognised as an expense

Consumable / workshop stores	56,817,992	65,485,517
Fuel - diesel and petrol	24,977,496	28,410,656
Forestry	14,694,702	10,666,737
Unused water	422,558,489	372,183,066

Inventory has been recorded using the First in First out (FIFO) method.

Impairment of inventory includes redundant and obsolete stock of 2015 (R 5 489 800) : 2014 (R 5 071 297).

During the 2012/13 financial year the department of Human Settlements donated land valued at R 693,4 million to build low cost housing for the community. The municipality was going to be the implementing agent. As such this land was accounted for as inventory and disclosed as such, as expectations were that the project would be under taken within twelve (12) months. However due to funding issues, the project has not been kick-started, and all indications are that it is not going ahead. In view of these developments, management determined that this land should be transferred to property ,plant and equipment as at 30 June 2015.

4. Trade receivables from non - exchange transactions

Other debtors	155,157,703	219,271,928
Land sale debtors	2,330,730	2,330,730
Rates	233,182,613	174,608,381
	390,671,046	396,211,039

Trade receivables from non - exchange transactions pledged as security

Trade and other receivables from non exchange transactions were not pledged as security for overdraft facilities.

Trade and other receivables from non exchange transactions includes prepayments to Independent Development Trust (IDT) of 2015 R 93.7 million : 2014 R 168.6 million. IDT have undertaken projects in respect of the infrastructure development and maintenance.

The Msunduzi Municipality had entered into a memorandum of agreement with the Independent Development Trust (IDT). They were appointed as funding coordinators and as an implementing agent of the municipality's electricity supply and maintenance programme.

In terms of IGRAP 1(Applying the probability test on initial recognition of exchange revenue) trade and other receivables from non exchange transactions had to be accounted for on an accrual basis.

Included in other debtors is a traffic fine debtor of 2015 R 30.5 million : 2014 R 26.4 million .

Credit quality of trade receivables from non - exchange transactions

Although credit quality can be assessed the municipality did not apply any methods to evaluate the credit quality.

The amount of the provision was 2015 (R 247 799 893) : 2014 (R 205 988 180) .

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

5. Trade and other receivables from exchange transactions (continued)

Consumer debtors pledged as security

Trade and other receivable from exchange transaction were not pledged as security for overdraft facilities.

Credit quality of trade and other receivables from exchange transactions

The credit quality of trade and other receivable from exchange transactions that are neither past nor due nor impaired can be assessed by reference to external credit ratings or to historical information about counterparty default rates. Although credit quality can be assessed the entity did not apply any methods to evaluate the credit quality.

Trade and other receivables from exchange transactions impaired

The amount of the provision was 2015 (R 725 491 124) : 2014 (R605 783 400) .

6. Cash and cash equivalents

Cash and cash equivalents consist of:

Cash on hand	46,485	45,485
Bank balances	96,550,501	49,926,440
Short term deposits - on call	349,548,304	507,301,338
Short term deposits - fixed	387,987,779	270,000,000
	834,133,069	827,273,263

Average rate of return	6.15	5.48
------------------------	------	------

Cash and cash equivalents are classified as financial instruments under the loans and receivables category.

Due to the short term nature of these investments no amortisation was performed.

Fair value is taken at face value.

No cash and cash equivalents were pledged as security for any financial liabilities.

No restrictions exist with regard to the use of cash.

No portion is past due or impaired.

These amounts best represent the maximum exposure to credit risk at the end of the reporting period, without taking into account of any collateral held or other credit enhancements.

Credit quality of cash at bank and short term deposits, excluding cash on hand

The credit quality of cash at bank and short term deposits, excluding cash on hand that are neither past due nor impaired can be assessed by reference to external credit ratings. Although credit quality can be assessed the Municipality did not apply any methods to evaluate the credit quality.

Pledged as security

No property, plant and equipment was placed as security for financial liabilities.

Refer to Appendix B for detailed property plant and equipment schedule.

During the 2013/2014 and 2014/2015 financial years the municipality undertook conditional assessment of community and infrastructure assets, which culminated in the decrease in remaining useful lives of assets. This resulted in the significant increase in depreciation.

The municipality elected to adopt depreciated replacement cost to calculate impairment. The impairment loss amounted to R 16.753 million for the period ending 30 June 2015.

The municipality is required to measure the residual value of all items of property plant and equipment. Management has determined that none of its infrastructural assets has any active market value, and the value of at the end of their useful lives would therefore be nil or insignificant during the current financial year. During the current financial year, the municipality reviewed the estimated useful lives and residual values of property plant and equipment, where appropriate.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

8. Property, plant and equipment (continued)

During the 2012/13 financial year the department of Human Settlements donated land valued at R 693,4 million to build low cost housing for the community. The municipality was going to be the implementing agent. As such this land was accounted for as inventory and disclosed as such, as expectations were that the project would be under taken within twelve (12) months. However due to funding issues, the project has not been kick-started, and all indications are that it is not going ahead. In view of these developments, management determined that this land should be transferred to property ,plant and equipment as at 30 June 2015.

10. Investment property

	2015			2014		
	Cost / Valuation	Accumulated depreciation and accumulated impairment	Carrying value	Cost / Valuation	Accumulated depreciation and accumulated impairment	Carrying value
Investment property	382,805,024	-	382,805,024	362,882,104	-	362,882,104

Reconciliation of investment property - 2015

	Opening balance	Revaluation	Adjustment	Disposals	Total
Investment property	362,882,104	25,222,920	(5,000,000)	(300,000)	382,805,024

Reconciliation of investment property - 2014

	Opening balance	Additions	Revaluations	Total
Investment property	326,488,524	12,203,000	24,190,580	362,882,104

The municipality elected to adopt fair value model to accounting for investment properties.

The fair value of investment properties as at 30 June 2015 has been arrived at on the basis of valuation carried out by BPG Mass Appraisals (Pty) Ltd valuers, independent valuers that are not related to the municipality.

BPG Mass Appraisals are members of the Institute of Valuers, and they have appropriate qualifications and recent experience in the valuation of properties in the relevant locations.

The valuations conforms to South Valuation Standards, was arrived at by reference to market evidence of transaction prices for similar properties.

Pledged as security

No investment property has been pledged as security for any financial liabilities.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Pledged as security

No heritage assets has been pledged as security for any financial liabilities

Revaluations

The Msunduzi Municipality has elected to use cost model when accounting for heritage assets, except for artworks.

After recognition as an asset, a class of heritage assets shall be carried at its cost less any accumulated impairment losses.

Full compliance with GRAP 103 has been effected retrospectively as at 1 April 2012.

However a class of heritage assets (artworks) have been revalued upwards for an amount of R 52 129 145 due to its nature.

The effective date of the revaluations was 31 October 2014.

Revaluations were performed by an independent valuer, Gilfillan 'Scott-Berning and are not connected to the entity.

Refer to the close out report for method of valuation.

11. Heritage assets (continued)

List of heritage assets where the values cannot be determined

1. Legal Deposit collection at the Bessie Head Library

In 1916, the Natal Society Library (now the Msunduzi Municipal Library – Bessie Head Library) was identified as one of 5 libraries in South Africa accorded Legal Deposit status. This privilege helped make it into one of South Africa's major research and information libraries. Legal Deposit Libraries play a unique and very important role as custodians, in perpetuity, of this country's cultural wealth and information. They also have to make this information available, as widely as possible, to the citizens of South Africa. The Legal Deposit Collection has become an important asset. Since 1916, the Msunduzi Municipal Library has amassed a huge collection of South African books, pamphlets, periodicals, maps and newspapers which it has to preserve for future generations.

2. Mahatma Gandhi Statue

The Statue was donated to the municipality in 1993 by the PMB Gandhi Memorial society in commemoration of the anniversary of Gandhi's eviction from a train at the Pietermaritzburg train station.

3. Highfield Road – (Site no. 166)

The land has been identified as a conservation site due to the endangered species of the Hilton Daisy, *Gerbera aurantiaca*. The Hilton daisy is a strikingly beautiful grassland plant that occurs around Pietermaritzburg in KwaZulu-Natal. The species is under considerable threat of extinction due to habitat fragmentation and degradation resulting from agriculture and urban sprawl.

4. City Hall Surrounding Garden and Memorial Plaque

This area has been identified as a heritage asset.

5. Tatham Art Gallery Gardens

This area has been identified as a heritage asset.

6. Alexandra Park

This area has been identified as a heritage asset.

7. Mayoral Chain

Stored in a secure safe at city hall

20. Provisions

Reconciliation of provisions - 2015

	Opening Balance	Additions	Total
Performance bonus	792,315	211,967	1,004,282
Long service awards	6,084,404	(55,053)	6,029,351
Landfill rehabilitation	61,002,002	847,675	61,849,677
	67,878,721	1,004,589	68,883,310

Reconciliation of provisions - 2014

	Opening Balance	Additions	Reversed during the year	Total
Performance bonus	682,489	792,315	(682,489)	792,315
Long service awards	3,714,230	2,370,174	-	6,084,404
Landfill site rehabilitation	55,456,365	5,545,637	-	61,002,002
	59,853,084	8,708,126	(682,489)	67,878,721
Non-current liabilities			61,849,677	61,002,002
Current liabilities			7,033,633	6,876,719
			68,883,310	67,878,721

The landfill site provision represents management's best estimate of the municipality's rehabilitation liability based on an valuation provided by an external consultant on the remaining useful life of the landfill site.

Envitech Solutions was appointed to provide the provision for the programme for closure of the New England Road landfill site.

Alien vegetation provision

According to the National Environmental Management Act, 1998 (Act No. 107 of 1998) the municipality was encouraged to recognise a provision in this regard.

The Department of Agriculture has since 2006 provided considerable support to the Msunduzi Municipality in terms of clearing listed alien invasive plants.

The Msunduzi Municipality's involvement and responsibility is effectively operational support to the Department of Agriculture terms of clearing listed alien invasive plants.

During the reporting period work was carried out in the following areas

- * Follow up conducted in Cleland Road / Mkondeni Spruit : +/- 3 HA
- * Follow up conducted in Lincolnmeade : +/- 2 HA

Initial clearing in Bisley Nature Reserve

Sickle Bush : +/- 10HA
Wattle trees : +/- 20 HA
Lantana : +/- 10 HA

An amount of R 169 682.52 was spent on wages for 8 contract staff for a period of 9 months from the 1st of September 2014 to 30th June 2015.

An amount of R 36 880 was utilised for the purchase of herbicide for the project.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

20. Provisions (continued)

Performance bonus

The performance bonus provision is based on the maximum expectation that all key management will perform in terms of their agreements.

Long service awards

The long service award provision is created to ensure adherence to SALGA collective agreement requirements. The estimate is based on the monthly salaries rate at 30 June 2015.

21. Retirement benefit obligations

Defined contribution benefit plan

The Council provides retirement benefits to its employees by contributing to either a pension or provident fund.

Membership to either a pension or provident fund is compulsory for all permanent employees.

The majority of the members and the Council contributes to the Natal Joint Municipal Pension (NJMP) and Provident funds, employees contributing to South African Local Authorities Pension Fund (SALA), Associated Institution Pension Fund (AIPF),

Pietermaritzburg Provident Fund and Government Employees Pension Fund (GEPF). Employees contributing to SALA, AIPF, Pietermaritzburg Provident Fund and GEPF make up the minority of members contribution to the pension funds.

The Msunduzi Municipality's liability in these funds can not be determined owing mainly to the assets not being allocated to each employer and one set of financials being compiled for each fund and not for each contributing employer.

Post retirement medical aid plan

The municipality operates on 6 accredited medical aid schemes, namely

1. Bonitas,
2. Discovery Health,
3. Hosmed,
4. Key-Health,
5. LA Health,
6. SAMWU Med,

pensioners continue on the option they belonged to on the day of their retirement.

The last post-employment health care benefits actuarial valuation in terms of GRAP 25 was done by Arch Actuarial Consulting for the period ending 30 June 2015. The valuation undertaken in accordance with the requirements of Professional Guidance Note (PPN) 301 of the Actuarial Society of South Africa.

According to the last valuation the accrued liability amounted to R 609.9 million as at 30 June 2015.

A reconciliation of Msunduzi's accrued liability for the year ending 30 June 2015 is set out below:

The amounts recognised in the statement of financial position are as follows:

Carrying value

Present value of the defined benefit obligation-wholly unfunded	609,937,137	559,848,366
Non-current liabilities	(591,899,445)	(543,597,210)

2015

2014

21. Retirement benefit obligations (continued)

Defined contribution plan

The majority of personnel are members of the following pension funds :

Kwa-Zulu-Natal Joint Municipal Provident Fund

An actuarial valuation was performed on 31 March 2014 by Argen Actuarial Solutions

Results of the valuation

The Fund self-insures its risk benefits in excess of the full benefit. It therefore maintains a Risk Reserve Account as a measure of protection against volatility in claims experience. The amount of R 21 123 000 required to be held in the Risk Reserve Account

The Fund is financially sound as at the valuation date.

Benefits of the fund:

- * Pension age - 65 years
- * Earliest retirement age - 58 years (55 years if more than 10 years continuous service)
- * Full benefit - Initial transfer plus member's contributions plus employer's contributions for full benefits plus investment earnings and bonuses.
- * Member's portion of full benefits - Initial transfer plus members contributions plus local authorities contributions for full benefits plus interim, special and final bonuses
- * Benefit on retirement after earliest retirement age or pension age - Full benefit.
- * Benefit on retirement because of ill health - Full benefit
- * Benefit on death in service - Full benefit plus 0.7% of annual pensionable salary for each month of potential service to a maximum of 2.1 years salary.

Contributions of the fund :

Members contributions

Members may choose to contribute at a rate of 5%, 7% or 9.25% of their pensionable emoluments in terms of regulation 14(a)

Local Authorities Contributions

Participating employers contribute at a rate of 1.95 times of the rate of members contribution in terms of regulation 17(1)(b)

Benchmark:

The benchmark asset allocation determined as being appropriate for the fund, which takes cognisance of membership and liability profile, is stated below :

Domestic Investments:	1,811,874,000
International Investments	450,267,000
Risk Reserve Account	21,123,000
Membership	11,448

Natal Joint Municipal Pension Fund: (Superannuation) actuarial valuation

Figures in Rand	2015	2014
-----------------	------	------

21. Retirement benefit obligations (continued)

An actuarial valuation was performed on 31 March 2014 by Argen Actuarial Solutions .

The market value of the Fund's assets was R8,923,854,000 as at 31 March 2014

The funding level in respect of contributory members has increased to 100% from 97.9%.

The regulations of the fund have been amended with effect from 1 July 2004, so that the Committee of Management is able to levy a separate surcharge on local authorities which grant excessive salary increases, thereby causing a financial strain on the Fund to the detriment of other stakeholders.

The employers are no longer permitting members to join the Fund, so that it is effectively closed to new members. This means that the average age will increase over time which, in turn, means that the required rate of contribution will also increase.

Thus, once the surcharge ceases, the underlying rate of contribution will not be sufficient to meet the cost of the benefits. It is necessary to set aside a reserve to hold assets equal to the expected shortfall. For this reason a Contribution Reserve is held equal to the present value of the shortfall in terms of the Financial Services Board's Circular PF117 for the 5 years to 2015 when it is expected that the surcharge will cease.

Benefits of the fund:

- * Members contributions - 9.25% of pensionable salaries.
- * Pension age 65 years
- * Final average salary - average annual pensionable salaries during the last year of service
- * Pension on retirement at pension age - 2.2% of final average emoluments per year of continuous service
- * Lump sum on retirement at pension age - 8.25% of final average emoluments per year of service
- * Pension on retirement because of ill-health (minimum ten years continuous service) - pension as for retirement at pensionage
- * Lump sum on retirement because of ill-health (minimum 10 years continuous service) - lump sum as for retirement at pension age.
- * Lump sum on retirement because of ill health (less than ten years continuous service) - the greater of the resignation benefit or twice the members contributions.
- * Surviving Spouses pension on death in service - 1,2% of final average emoluments per year of continuous service that the member would have had at the pension age.
- * Surviving Spouses pension on death of pensioner - 1,22% (0,77% in the case of a pensioner who retired before 1 July 1999) of final average emoluments per year of continuous service.
- * Lump sum on death in service - Annual pensionable emoluments.10.75% of final average salaries
- * Withdrawal - members contribution plus 5/12% for each month of continuous service (the addition is approximately equal to compound interest at 10% a year) and increased by 5% for each complete year of service up to a maximum of 20 years.

Benchmark :

Investments	
Domestic	7,104,533,000
International	1,948,213,000
Membership	4,964

Umgeni Water Provident Fund	304,506	276,175
	156,881,375	147,844,140

22. Housing development fund

Unappropriate surplus	19,625,820	17,286,094
Loans extinguished by Government on 1 April 1998	34,256,892	34,256,892
	53,882,712	51,542,986

The housing development fund is represented by the following assets and liabilities

Property, plant and equipment	-	(1,620,309)
Housing selling scheme loans	9,229,180	8,330,621
Trade and other receivables	30,260,067	28,042,180
Bank and cash	14,393,465	16,790,495
Assets	53,882,712	51,542,987

23. Revaluation reserve

The municipality has elected to adopt the revaluation model when accounting for heritage assets - artworks, due to their nature.

Revaluations were performed by an independent valuer, Gilfillan 'Scott-Berning and are not connected to the entity.

Transfer to revaluation reserve for artworks	52,129,145	52,129,145
--	------------	------------

24. Capital replacement reserve (CRR)

Based on the approval by the strategic management committee on the 7th of April 2015 the CRR was created by transferring funds of R 150 million from the accumulated surplus to the CRR.

This reserve will be used for the funding of property plant and equipment.

Included in the reserve is an amount of R1, 935 million of interest earned on the reserve.

The CRR is cash backed reserve.

Capital replacement reserve	151,935,999	-

Rural communal land	35,000,000	-
	59,437,354,520	49,547,507,119

General valuations on properties are performed every 4 years in terms of the Municipal Property Rates Act. The last general valuation came into effect on the 1st July 2009. Supplementary valuations are taking place on an annual basis to take into account buildings additions, changes, sub divisions and consolidations.

A new valuation roll came into effect on 1 July 2014.

A general rate of 0.0192 cents in a rand for 2015 and 2014 : 0.0213 cents in a rand is applied to property valuations to determine assessment rates.

The adjustments during the year are compiled of all interim assessments, corrections and amendments to the accounts. This includes any transfer of payments, penalty reversals and value changes. A list of adjustments is available on a monthly basis and forms part of the scope by the Auditor General.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
39. Depreciation and amortisation		
Property, plant and equipment	462,424,196	439,126,523
Intangible assets	639,238	20,776,524
Change in accounting estimate	1,472,100	(7,232,876)
	464,535,534	452,670,171
Change in accounting estimate relates to review of useful life for fully depreciated assets as per GRAP 17 and the reclassification of property, plant and equipment to investment property. The effect of this estimate is an increase on the depreciation of R 1 472 100.		
40. Impairment of assets		
Impairments		
Property, plant and equipment	16,152,984	222,450
The procedure used to determine if the asset was impaired was to physically inspect the asset and determine if the asset was impaired and what factors contributed to the impairment and then comparing the condition, age and cost of the asset to the current records in the asset register and if there was a change this was then adjusted accordingly		
No impairments have been reported on cash generating assets because all assets acquired and which management has confirmed are primarily acquired for service delivery		
Inventory loss	418,503	439,603
Due to technological changes the inventory has become redundant.		
	16,571,487	662,053
41. Finance costs		
Loans	61,658,633	63,756,841
Other interest paid	8,537,965	3,280,326
Finance leases	972,673	136,977
	71,169,271	67,174,144
No external funding was raised for capital projects during the reporting period.		
42. Debt impairment		
Contributions to debt impairment provision	222,109,923	112,679,217
43. Collection costs		
Collection costs	5,972,677	15,372,628

57. Deviation from supply chain management regulations

Regulation 36 Deviations

Regulation 36 of the Municipal SCM Regulations of 2005 permits the Accounting Officer to "dispense with official procurement processes established by the policy and to procure any required goods or services through any convenient process".

This would typically include urgent and emergency cases, single-source goods, and any other cases where it is impractical to follow normal SCM process. In the event of such a decision, the Accounting Officer is required to report this to the next Council meeting for noting. The expenses incurred as listed below have been condoned.

Incidents

Legal	1,920,972	578,713

Computer expenditure	2,253,997	739,926
	104,466,719	20,650,779

58. Litigation prepaid meters

Commissions - are calculated on sales from prepaid electricity sales made by vendors on behalf of the Council. The commissions are included in the general expenses category of the statement of financial performance.

In the 2006/2007 financial year two vendors had defaulted in depositing amounts received from prepaid sales. As a result no commission was paid to them. The defaulting vendors are Sweet waters and Phayiphini who had ceased trading in January 2007 and October 2006 respectively.

The amounts of R55 723 and R75 896 respectively are deemed to be irrecoverable for the 2005/2006 financial year. Also the amounts of R13 980 and R15 671 being the movements for the 2006/2007 year are deemed irrecoverable.

This matter is being handled by the legal division in conjunction with the SAPS - Commercial branch unit and Venn Nemeth & Hart attorneys.

62. Events after the reporting date

No events to report on after the reporting date.

63. Changes in accounting policy

The Msunduzi Municipality has elected to use cost model when accounting for heritage assets except for artworks.

However a class of heritage assets (artworks) have been revalued for an amount of R 52 129 145 due to its nature.

The effective date of the revaluations was 31 October 2014.

Revaluations were performed by an independent valuer, Gilfillan Scott - Berning.

64. Prior period errors		
The comparative statements for 2013/2014 financial year have been restated to recognise the amendments relating to all of the errors below.		
The effects of the changes are detailed below:		
Statement of financial position		
Inventory		
Write-off of redundant stock relating to mechanical workshops approved in terms of the inventory management policy.		
Balance previously reported	-	743,239,027
Write-off of redundant stock - 2004 / 2005	-	(674,292)
Restated balance	-	742,564,735
Trade and other receivables		
Write back of unallocated consolidated billing clearing accounts		
Balance previously reported	-	403,194,000
Write back of unallocated suspense accounts - 2004 / 2005	-	1,971,558
Restated balance	-	405,165,558
In terms of the debt collection procedures in respect of terminating services council could not validate the tampering of the meter by the consumer.		
Balance previously reported	-	405,165,558
Crediting of the consumer debtor account on additional charges raised - 2011 / 2012	-	(452,037)
Restated balance	-	404,713,522
Investment property		
Increase of investment property due to revaluation performed by BPG Mass Appraisals (Pty) Ltd valuers		
Balance previously reported	-	330,572,104
Take on of investment property	-	32,310,000
Restated balance	-	362,882,104
Property plant and equipment		
Balance previously reported	-	6,054,916,230
Revaluation of land initially recognised at zero value	-	2,000
Revaluation of land as per market value	-	13,075,001
Revaluation of land initially recognised at zero value - Ezemvelo	-	4,200,000
Transfer of Safe City assets from Msunduzi asset register	-	(713,034)
Correction of accumulated depreciation and depreciation as per review of useful adjustments erroneously adjusted	-	1,401,709
Reallocation for investment property to property plant and equipment	-	26,341,712
Initial recognition of finance leases	-	2,754,543
Landfill site adjustment	-	28,579,617
Reallocation of intangible assets	-	(1,330,405)
Restated balance	-	(169,641)
Restated balance	-	6,129,057,730
Intangible assets		
Balance previously reported	-	2,097,543

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
64. Prior period errors (continued)		
Reallocation to property plant and equipment	-	169,641
Restated balance	-	2,267,184
Unspent conditional grants		
Repayment of unspent conditional grants to due to rollovers not approved by National Treasury for electricity demand side management grant and municipal infrastructure grant		
Balance previously reported	-	291,314,078
Repayment of electricity side demand management grant	-	(2,980,459)
Repayment of municipal infrastructure grant	-	(4,234,997)
Restated balance	-	298,529,534
Payables from exchange transactions		
Purchase of brush cutters by parks department		
Balance previously reported	-	453,062,864
Purchase of brush cutters	-	(153,509)
Restated balance	-	452,909,355
Finance lease liability		
Re-classification of computer operating lease to finance lease		
Balance previously reported	-	4,005,963
Re-payment of finance lease obligation	-	(339,354)
Restated balance	-	3,666,609
Statement of Financial Performance		
Service charges		
During the 2014/15 financial year the municipality corrected a fundamental error.		
The municipality discovered that water & electricity consumption was estimated for a longer period in contravention of municipality's debt collection and credit control policy. The municipality therefore embarked in an extensive exercise of locating and reading the meters in order to obtain accurate readings.		
Balance previously reported	-	2,073,501,239
Reversal of estimated meters in respect of duplications and none existing meters	-	(10,168,858)
Restated balance	-	2,063,332,381
Property rates		
Property rated appeal upheld by the appeal board		
Balance previously reported	-	602,953,620
Appeal court decision property rated adjusted - 2009 / 2010	-	(1,666,375)
Restated balance	-	601,287,245
Depreciation		
Provision for the rehabilitation of the landfill site		
Balance previously reported	-	452,670,171
Recognition of depreciation on the landfill site	-	28,579,617
Restated balance	-	481,249,788
Backlog depreciation on the transfer of investment property to property plant and equipment		
Balance previously reported	-	481,249,788
Adjustment to depreciation	-	(1,330,405)

65. Change in accounting estimate

Property, plant and equipment

Review of useful life for fully depreciated assets according to GRAP 17 and the reclassification of property, plant and equipment to investment property. The effect of this revision has increased the depreciation by R 1 472 099.73

Provisions

The leave pay provision is created to ensure adherence to SALGA collective agreement requirements. It states that at the end of a leave cycle, an employee may not have more than 48 days annual leave to his credit. The effect of this revision has increased the provision by R 6 482 216.49.

The long service award provision is created to ensure adherence to SALGA collective agreement requirements. The estimate is based on the monthly salaries rate at 30 June 2014. The effect of this revision has decreased the provision by R55 053.

Interest on : Late payment to Macwin	20,819	-
Purchase and distribution of diaries calendars, wall planners and desk calendars	285,759	-
	435,396	138,813
A system has been put in place to stream-line the payment process to ensure non occurrence of interest costs. Staff have been advised on possible recovery of costs due negligence.		
69. Unauthorised expenditure		
Reconciliation of unauthorised expenditure		
Opening balance	12,379,824	21,073,373
Add: unauthorised expenditure - current year	-	12,379,824
Less: writttern off expenditure - prior year	-	(21,073,373)
	12,379,824	12,379,824
Funds still to received from KZN Provincial Treasury Nhlalakahle informal settlement electrification project for an amount of R 181 941 and from the department of Human settlements for Jika Joe informal settlement for an amount of R 12 197 883 amounting to R 12 379 824.		
70. Electricity ,water and inventory losses		
Electricity losses		
Units purchased - kWh	1,739,221,935	1,735,228,615
Units sold - kWh	(1,504,286,888)	(1,537,738,108)
Loss - kWh	234,935,047	197,490,507
Electricity loss as a percentage	13.51	11.38
	-	-
Cost per kWh in cents	0.76312	0.71033
Electricity loss in rand value	179,284,023	140,283,985

The significant electricity losses of 2015 : 234,935,047 kWh (2014 : 197,490,507 kWh) occurred during the year under review, which resulted in material revenue losses to the municipality.

The acceptance norm of electricity loss is 7% and 10%. as per MFMA circular 71 dated January 2014.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
70. Electricity ,water and inventory losses (continued)		
The increase in the loss is to illegal connections to consumers.		
Water losses		
Units purchased -KI	70,387,564	67,004,044
Units sold - KI	(47,142,418)	44,943,173
Losses - KI	17,201,409	22,060,871
Apparent losses - KI	6,043,738	(5,735,826)
Real losses - KI	23,245,147	16,325,045
Water loss as a percentage	33	24
	-	-
Rand per kilolitre	5.07000	4.68200
Water loss in rand value	117,859,869	76,433,861

For the 2014/2015 reporting period there has been a change in the methodology for the calculation of the water losses as per MFMA circular 71 dated January 2014.

The acceptable norm as per the above circular for water losses is between 15% to 30%.

The significant water losses of 2015: 23,245,147 kl (2014: 16, 325, 045 kl) occurred during the year under review, which resulted in material revenue losses to the municipality.

A contributing factor to the increase in the water losses is the aging pipeline infrastructure.

In the 2015 / 2016 financial year the municipality has budgeted R 5.3 million for the replacement of the aging pipelines.

Activities carried out for real loss initiatives

1. Pressure reducing valves (PRV) maintenance and repairs - this has been completed in the old and new city only.
2. PVR optimisation - ensure that the larger PRV zones would remain discreet by utilising a magnetic valve top on all crown valves as well as upgrading and / repairing existing PRV's and their chambers.
3. Advances controllers - core focus was to change / install seven i20 advanced PRV controllers that would decrease the real losses and burst frequency for the municipality.
4. Creation of new district metering areas (DMA) - four new DMA's in the CBD were created, to help zone the CBD.
5. Meter replacement program - five plumbing contractors were awarded rate based contracts to help eliminate the exception reports received from the revenue unit. At the end of the reporting period 4 255 domestic meters were replaced.
6. Standpipe metering - approximately 300 of the 730 standpipes could be found. These have been earmarked to be metered in the next reporting period.
7. Telemetry upgrades - telemetry upgrades on all reservoir outlets were completed at the following sites as which include Bisley, Oribi, Murray, Haythorns, and Symmons reservoirs.

Inventory losses

418,502	439,602
---------	---------

There has been a close monitoring and interrogation of the movement of inventory. Additional staff have been appointed to maximise efficiency of the central stores.

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

71. Municipal entity

Grant paid to Safe City (Pty) Ltd	11,333,904	4,210,526
-----------------------------------	------------	-----------

The Safe City project PMB was declared a municipal entity in terms of the MFMA and was incorporated as a section 21 company and was initiated in partnership with the business sector to create a safer CBD

72. Traffic fines outstanding

As per NATIS - traffic department

Notice of intention to prosecute - 341's	12,778,200	2,015,700
Paid	(251,900)	(11,350)
Withdrawn	(136,050)	(10,300)
Unsuccessful	(32,700)	(7,750)
Warrant of arrest	(1,350)	-
Section 56 notices - summons	3,525,950	3,811,350
Paid	(333,215)	(359,190)
Withdrawn	(932,610)	(732,750)
Unsuccessful	-	(371,735)
Warrant of arrests	(193,025)	(147,475)
	14,423,300	4,186,500

73. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance.

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, municipality treasury maintains flexibility in funding by maintaining availability under committed credit lines.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities. Refer to table on the next page.

At 30 June 2015	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Borrowings	48,641,698	289,548,277	255,123,845	593,313,820
At 30 June 2014	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Borrowings	42,846,565	257,601,137	239,071,729	539,519,431

Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the group to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk.

Credit risk

The Msunduzi Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

73. Risk management (continued)

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

74. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.
